

About Orenco

Orenco Systems[®], Inc. was founded in 1981 by President Hal Ball and Executive Vice President Terry Bounds to respond to widespread failures in Oregon's onsite wastewater systems.

Over the past 27 years, the company has grown to become an industry leader, with nearly 300 employees and more than 100 distributors and dealers, who represent most of the United States, Canada, Australia, New Zealand, and parts of Europe. Research, Product Development, Engineering and Technical Services, Manufacturing, Regulatory Relations, and Sales Support are handled out of our 23-acre (9 hectare) facility in Sutherlin, Oregon.

Orenco designs and manufactures advanced onsite and decentralized wastewater technologies for individual properties, commercial facilities, and small communities – properties that are not connected

to centralized sewers or whose sewers are failing or at capacity.

Our wastewater solutions involve watertight fiberglass tanks, in-tank filtration systems (Biotube[®] effluent filters and pump vaults), secondary treatment systems (AdvanTex[®] textile filters, intermittent sand filters, and recirculating sand filters), effluent sewer collection systems, ProSTEP[®] pumping packages, accessory items, and advanced electrical controls (see back).

Our products and systems allow treated effluent to be returned harmlessly to the environment via drainfield, subsurface irrigation, or surface discharge. We have a

maintenance division and an environmental lab, and we invest time and money in a continuing research program, often in cooperation with colleges and universities.

Our research and technologies appear in numerous publications, including Metcalf & Eddy's *Wastewater Engineering: Treatment, Disposal, Reuse* and Crites & Tchobanoglous' *Small and Decentralized Wastewater Treatment Systems*. Our engineers are regularly asked to give workshops, and our systems have been installed all over the world.

Orenco Systems® Your Control Center

Orenco Systems® specializes in manufacturing control and monitoring systems for the water handling and wastewater industries. Our experts know what issues are important to designers, engineers, and system operators.

From a simple liquid level alarm to a custom-built control system featuring digital programmable logic or remote monitoring capabilities, Orenco offers the best value for your dollar. We use the finest precision-engineered components available, and we back up our panels with ongoing research and years of applied experience.

Orenco offers controls for a wide range of applications:

- Alarm panels
- Standard electromechanical panels
- MVP digital programmable panels
- VCOM remote telemetry panels (Web-based)
- TCOM remote telemetry panels (dial-up)

All Orenco panels include

- Touch-safe controls
- Three-year warranty
- NEMA 4X rating for wet locations
- UL 508 listing in the United States and Canada
- CE marking in Europe

UL 698A-listed products for hazardous locations (Class I, Division 1) are also available.

Although our panels are designed for use in onsite wastewater treatment, they can also be used in many other applications. In addition to the products in our catalog, we can supply OEM and customer-labeled components.

We're known for the high caliber of our panel support services. For assistance, call 800-348-9843.
